

**Procedures Used by
Huckleberry Cheesecake
to
Reduce the Risk of SIDS**

- * We always put infants to sleep on their back unless we have written instructions from the infant's doctor directing us to do otherwise.
- * We closely monitor sleeping infants to make certain that they are not overheated.
- * We use only firm, flat crib mattresses for infants.
- * We make certain there is no loose bedding or soft toys or pillows where the infants are sleeping.
- * We make certain that the infant's head remains uncovered during sleep.
- * Infants in our facility are supervised by staff members at all times, even when the infants are sleeping.
- * All staff members who care for infants at Huckleberry Cheesecake are trained in Infant CPR and know to resuscitate infants if they stop breathing for any reason.

Please sign and date this statement in the space provided below and return to Huckleberry Cheesecake.

We, the parents of _____ have read this SIDS Risk Reduction statement and understand that our baby will be placed to sleep on his/her back while in care at Huckleberry Cheesecake.
